

Alastair McBride

BAcc Accounting Graduate

Kilmarnock, Scotland | 07895 770953 | amcb.home@gmail.com
GitHub: github.com/amcbhome/delivery-LP

PROFESSIONAL PROFILE

Dedicated and detail-oriented Accounting professional with a BAcc (2:1) and specialized expertise in data analytics and automated accounting systems. Proven ability to combine traditional financial reporting with Python-based prescriptive analytics to streamline organizational processes and support data-driven decision-making. Committed to continuous professional development within a Graduate Accounting framework.

CORE SKILLS

Software	Sage Accounting, Microsoft Excel (Advanced), Python for Accounting, Streamlit.
Finance	Accounts Payable/Receivable, Bank Reconciliation, Credit Control, Financial Reporting.
Operations	Inventory Valuation (FIFO/EOQ), Stock Management, Data Accuracy, Stakeholder Liaison.

TECHNICAL PORTFOLIO

Project: Logistics Route Optimizer (Prescriptive Analytics)

Live Repository: github.com/amcbhome/delivery-LP

- Engineered a Python-based optimization tool using the **SciPy** engine to solve the "Transportation Problem," a core concept in ACCA/CIMA management accounting.
- Implemented prescriptive logic to calculate the absolute minimum shipping cost for 6,850 units across a network of three depots and three retail stores.
- Designed and deployed an interactive **Streamlit** dashboard to provide immediate data for operational workflows and utilization analysis.
- Aligned project outcomes with the World Economic Forum's 2025 focus on automated business decision-making and analytical innovation.

EDUCATION

BAcc Accounting 2023 – 2025

University of the West of Scotland | Final Grade: 2:1
